Self-Knowledge In and Out of Illness

3 and 4 May 2016

Guy's Campus
King's College London
SE1 1UL

A two-day symposium exploring the role of self-knowledge in health care. All welcome, including staff, students and members of the public.

3 May, Greenwood Lecture Theatre

Morning (09.00 - 12.30)

Self-reflection in illness and health: literal and metaphorical?

Tony David *King's College London*

Metacognition for acting and deciding together

Nick Shea *King's College London*

Self-perception of weight: is a little knowledge a dangerous thing?

Fiona Johnson *UCL*

Big data, Big Brother and the internet of things: the challenges of implementing mobile health

Matthew Hotopf *King's College London*

Afternoon (14.30 - 17.30, followed by reception)

Psychological aspects of breast self-examination

Paul Norman *University of Sheffield*

Self-knowledge in diagnosis and self-diagnosis

Quassim Cassam *University of Warwick*

Skin self-examination

Fiona Cowdell and Judith Dyson *University of Hull*

4 May, Harris Lecture Theatre, Hodgkin Building

Morning (09.00 - 12.00)

Genetic screening: tales from the real world

Christine Patch *Guy's and St. Thomas' Hospitals*

Hypochondria and self-re-calibration

Sherri Roush *King's College London*

Self-cultivation and self-knowing: knowledge as style

Sacha Golob *King's College London*

Afternoon (14.00 - 17.00)

"I just know" – experiences of self-managing acute exacerbations in COPD

Veronika Williams *University of Oxford*

What kind of knowledge can illness promote?

Havi Carel *University of Bristol*

Sailing close to the wind: models and metaphors for the self-management of diabetes

Tim Holt *University of Oxford*
